

CRIG seminars present:

Dr. Marc Stemmler

Zeb1 expression in cancer and stroma cells is crucial for tumor cell plasticity, progression and metastasis

Marc Stemmler is Principal Investigator in the Department of Experimental Medicine 1, Nicolas-Fiebiger-Center for Molecular Medicine, FAU University Erlangen-Nürnberg, Germany.

His major interests are the underlying mechanisms of epithelial-to-mesenchymal transition (EMT) in vivo, such as feedback loops between EMT-inducers, oncogenic pathways and microenvironmental cross talk.

 Wednesday April 24, 11-11.45

 Seminar room MRB2 (UZ campus entrance 38)
UZ Gent, C. Heymanslaan 10, Ghent

 host & contact: Geert.Berx@ugent.be
